

# Precision Positioner TP250

The versatile, high-precision positioner

\* 1 adapter for microprobes and 1 adapter for PacketMicro probes included.

\* US Patent 10,830,793

## Precision Positioner TP250

TP250 probe positioner can be used in all PacketMicro Do-It-Yourself (DIY) horizontal and vertical probe stations. Its high-precision XYZ stage with magnetic lock at the base and long probe arm with  $\theta$  control make it ideal for probing with microprobes and rugged PacketMicro probes in a wide range of RF and signal-integrity measurements.

TP250 has patented planarity ( $\theta$ ) control mechanism, which does not use the typical spring-loaded design, to avoid potential damage to the test probe mounted on its probe adapter. The extra-large control knobs for XY axes ensure smooth, fast movement of the microprobe and rugged RF probe.

## Superior Usability

- Rugged, ergonomic design
- Easy, quick rearrangement of positioner with a lockable magnetic switch
- Coarse probe arm height movement without tool
- High-quality material and precision design ensure accurate and repeatable measurements
- Adapters for holding typical microprobes and PacketMicro's rugged probes
- Universal adapter for holding large oscilloscope and RF probes
- Special 90° arms for different probing orientations
- Work with all PacketMicro horizontal and vertical probe fixtures

## TP250 Specifications

- XYZ-axis travel:** 16 mm with 500  $\mu\text{m}/\text{turn}$  (50 TPI) and extra-large x/y-axis control knobs
- Height coarse adjustment:** 5 mm/step (14 steps)
- Resolution:** 5  $\mu\text{m}$
- $\theta$  (Planarity) control:**  $\pm 10^\circ$  with 2.5°/turn and 0.025° resolution
- Length:** 9 in/228 mm
- Width:** 3 in/76 mm
- Height:** 4.3 in/108 mm
- Weight:** 2.86 lb./1.30 kg

## Part Number:

- TP250Base:** 4"x3"x1.5", 5 lb. (3.87 kg)
- TP250R:** Right-handed TP250
- TP250RB:** Right-handed TP250 with TP250Base
- TP250L:** Left-handed TP250
- TP250LB:** Left-handed TP250 with TP250Base
- TP250-ARM-AL:** Left-handed TP250 arm with 90-degree adapter head
- TP250-ARM-AR:** Right-handed TP250 arm with 90-degree adapter head

TP250 supports microprobes, S/D-Probes, DC probes with straight and angled arms

## Other TP250 Configurations

TP250 Probe arm can be adjusted for different orientations and positions without using any tool.

## TP250 for Benchtop RF Probing

Horizontal probing of RF module and circuit board

Constant shrinking size of circuit components makes soldering semi-rigid RF pigtail cables to test gigahertz circuits impractical. Our simple, easy-to-use probe station and probes are ideal for testing antennas, RF modules, and circuit boards.

## TP250 for Large PCB Probing

Large PCB Station (HPF24-T2-S2)

This compact, lightweight probe station can easily be set up in 10 mins for probing 18" PCBs.

- Size: 24" L x 24" W x 3.8" H
- Weight: 45 lb.
- PCB Size: 18" Length x unconstrained Width

## TP250 for 2-sided PCB Probing

2- Sided PCB Probe Station (VPF10-H4-V4-S4)

This innovative probe station makes 2-sided probing easy and is designed for laboratories with limited space.

- Size: 29" H x 32" W x 13" Depth
- Weight: 33.5 lb.
- PCB Size: 10" Height x unconstrained Width

## Universal Adapter (UA16-TP250)

UA16 adapter can be mounted on TP250 for holding large oscilloscope and RF probes.

- Size: 25 mm L x 27 mm W x 35 mm H
- Opening: adjustable 4 – 16 mm

**PacketMicro**, headquartered in Silicon Valley, provides one-stop shopping for your needs in PCB probing and signal-integrity analysis. Its product offering includes a wide range of rugged RF probes up to 40 GHz, patented probe positioners, DIY bench-top probe stations, flexible phase-stable RF cables, digital microscopes, and AITT signal-integrity analysis tools.
